

Welcome to the [Pennsylvania Climate Convergence](#)! This June 11, 12, and 13, people from across Pennsylvania will be converging in the streets in Harrisburg to change the conversation on climate change.

The Pennsylvania Climate Convergence's organizers are frontline community members, grassroots organizers, and advocates.

The PA Climate Convergence is a diverse, inclusive, peaceful gathering organized to demand urgent legislative and administrative action on climate. The path to climate justice necessarily includes the phase out of greenhouse gas production and a just transition to clean, renewable energy for those most affected by the exploitative fossil fuel and petrochemical economy.

Because many of our partner organizations are registered non-profits, we are not able to include political parties, PACs, or 527 groups in our scheduled events and actions.

## **#PAClimate2022**
